spraying and hand-dressing the cattle with oil and oil emulsion.

In sections where there are large herds and large ranches dipping on a large scale is practiced, either alone or in connection with pasture rotation, while in other sections, where the cattle on some farms frequently consist only of a cow or an ox team, hand dresing with oil is found to be the oily practicable method.

Work Immense Damage.

The damage caused by the ticks and the benefits to follow from their eradicallon are not generally appreciated. It is estimated that the Texas fever tick is responsible for about \$46,000,000 of loss annually to the people of the infected country, and that it also lowers the assets of the South by an additional \$23,250,000, making the enormous aggregate of \$63,250,000. To wipe out this heavy loss is the object of the work now under way, and the results already accomplished leave no doubt yellow onlone, barrel, \$2,50 to \$1,75 per care.

WEAK ANCHED FEET.

A SORE HEEL IS THE FIRST SYMPtom of a failing arch (flat foot) and is known in medicine as a specific aliment, viz.: "policeman's heel." While not at first alarming, it soon grows severe and indicates a serious condition of the foot. Any one so afflicted may become a cripple unless by proper mechanical devices the arch of the foot is upheld for a time and the pressure on the heel from the weight of the body relieved. This very painful condition of the foot is often wrongly diagnosed as rheumatism or gout. The foot-rest will quickly relieve the pain and by retaining the bones of the arch in proper position, will eventually cure. Persons standing on their feet continually, or having to walk much, will appreciate this appliance as restful to the feet. Not being fastened in the shoe it is easily interchangeable, W. E. DREW & CO., Orthopedic Cordwalners, 716 East Main Street. SORE HEEL IS THE FIRST SYMP BOOKS WANTED.
